DBpedia Databus

The collector for linked datasets

Not only for DBpedia!

How to publish data?

1. Create your WebID: <https://github.com/dbpedia/webid>
 - Public key defined by an URI
2. Publish your WebID via HTTP
3. Add your WebID into the Databus account list:
<https://github.com/dbpedia/accounts>
4. Create a Maven project for your datasets with **pom.xml** and the **.md documentation**
5. Specify paths to the private key, WebID and dataset locations
6. Run the Maven project to **upload all** datasets and metadata into the Databus
